

Jane Smith

Email: jane.smith@email.com | Phone: 987-654-3210 | LinkedIn: linkedin.com/in/janesmith

Location: New York, NY

Professional Summary:

Passionate Data Scientist with 3+ years of experience in data analysis, statistical modeling, and machine learning. Skilled in transforming raw complex data into actionable business insights and predictive systems.

Technical Skills:

- Languages: Python, R, SQL, MATLAB
- Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, PyTorch, XGBoost
- Data Processing: Pandas, NumPy, SciPy, Apache Spark
- Visualization & BI: Tableau, Matplotlib, Seaborn, PowerBI
- Database: MySQL, MongoDB, PostgreSQL
- Environments: Jupyter Notebooks, Git, Docker, Google Colab

Professional Experience:

Data Scientist | Analytics Inc (2021 - Present)

- Developed and deployed predictive machine learning models (random forests, gradient boosting) using Python and Scikit-learn.
- Preprocessed, cleaned, and engineered features from large unstructured datasets of 1M+ records using Pandas and NumPy.
- Built interactive dashboards in Tableau to display model performance metrics and business KPIs to executives.
- Performed A/B testing and statistical analysis to evaluate product features, driving a 15% increase in user retention.
- Collaborated with software engineers to integrate ML models into production API endpoints.

Data Analyst | Retail Solutions Corp (2019 - 2021)

- Performed statistical analysis and created SQL queries to extract data insights from business databases.
- Created Python scripts for automated data cleaning, validation, and scheduled reporting.
- Visualized sales data using Seaborn and Matplotlib to identify market trends.

Education:

Master of Science in Data Science | Tech Institute (2017 - 2019)

Bachelor of Science in Mathematics | State College (2013 - 2017)
