Location: San Francisco, CA

Professional Summary:

Enthusiastic and results-driven Software Engineer with 4+ years of professional backend development experience. Specialized in building scalable web applications and REST APIs using Python and associated frameworks.

Technical Skills:

- Programming Languages: Python, JavaScript, SQL, Bash
- Frameworks & Libraries: Django, Flask, FastAPI, NumPy, Pandas
- Databases: PostgreSQL, MySQL, Redis, SQLite
- Tools & DevOps: Git, Docker, GitHub Actions, AWS, Linux, RESTful Web Services
- Methodologies: Agile development, Scrum, Test-Driven Development (TDD)

Professional Experience:

Senior Software Engineer | Tech Corp (2022 - Present)

- Designed and built scalable web applications using Python and Django.
- Developed robust RESTful APIs for mobile and web clients, serving 10k+ daily active users.
- Integrated database storage with PostgreSQL and optimized complex SQL queries, improving load times by 30%.
- Containerized development and production environments using Docker and Docker Compose.
- Mentored junior python developers and conducted code reviews to maintain high quality standards.

Python Developer | Web Solutions Inc (2020 - 2022)

- Created backend services using Python, Flask, and SQLite.
- Collaborated with front-end developers to integrate client-side React code with backend APIs.
- Maintained CI/CD pipelines for automated testing and deployment.
- Wrote clean, readable, and maintainable code adhering to PEP 8 guidelines.

Education:

Bachelor of Science in Computer Science | State University (2016 - 2020)
